

New Catalysts, New Reactions and New Functional Materials

Zhaomin Hou

Organometallic Chemistry Laboratory, RIKEN Cluster for Pioneering Research
and

Advanced Catalysis Research Group, RIKEN Center for Sustainable Resource Science
2-1 Hirosawa, Wako, Saitama 351-0198 Japan

In this seminar, I would like to talk about our recent studies on the development of new catalysts, new reactions and new functional materials, including C-H activation and transformation by rare-earth catalysts, dinitrogen activation and functionalization by titanium hydride clusters, and the synthesis of self-healing polymers by catalyst-controlled microstructure regulation.
