

Prof. Dr. Torsten Beweries

Birthday and place of birth: 16 April 1982, Anklam

Address: Leibniz Institute for Catalysis at the University of
Rostock, Albert-Einstein-Str. 29a, 18059 Rostock,
Germany

Position: Head of research department Modern concepts in
molecular catalysis

Research areas: homogeneous catalysis, o

Grants

Deutsche Forschungsgemeinschaft (DFG):

- BE4370/1-1: Quantification of the interactions of group 8 and group 10 metal fluorides with hydrogen and halogen donors in solution contributions to a better understanding of the nature of the metal fluoride bond (2009, Research fellowship for postdoctoral stay with Prof. Robin N. Perutz, FRS, University of York, UK)
- BE4370/2-1: Übergangsmetallkatalysierte Dehydrierung von Amin-Boran-Addukten als Speichermedien für Wasserstoff (2011-2013, research grant)
- BE4370/5-1: Supramolekulare und kovalente Metall-BODIPY-Hybride zur photokatalytischen H₂-Erzeugung (2017-2020, research grant)
- BE4370/9-1: Katalytische Wege zu neuen anorganischen Polymeren: Entwicklung von Übergangsmetall-Katalysatoren für die hochselektive Dehydropolymerisation von primären Amin-Boran-Addukten (2019-2022, research grant, 368.7
- BE4370/11-1: Metallacyclobuta-2,3-diene als metallorganische Analoga des kleinsten cyclischen Allens Klassische Metallacylen oder ungewöhnliche Übergangsmetall-Biradikale (2021-
- BE4370/9-2: Development of cooperative late transition metal pincer complexes for manufacturing B-N based main group polymers on scale (2023-2026, research grant,

Leibniz association:

- Senatsausschuss-Wettbewerb 2017: Iron based catalysts for sustainable valorisation of CO₂, CH₄ and N₂ (2017-
- Senatsausschuss-Wettbewerb 2019: Development of a predictive solid state tool for improved pharmaceuticals safety (project coordinator, 2019-2022, 909.334 total,)
